The Drug Policy Parabola

@parabolacenter

It's a simple way to illustrate the person-first drug policy framework we're working toward.

The Two Extremes

@parabolacenter

Prohibition

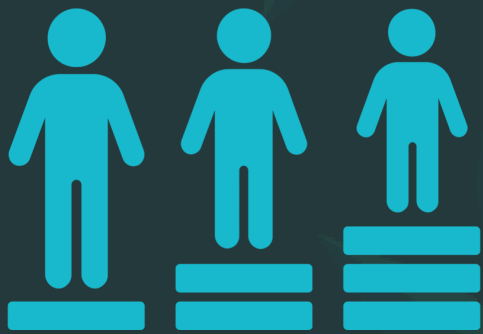

results in unregulated markets, higher incarceration rates, and widespread systemic injustices.

Deregulation

risks a small number of corporations prioritizing profit over public health, as seen with industries like tobacco.

Finding a Happy Medium

The center of the parabola represents a happy middle ground and creates balanced regulation that creates a legal market rooted in:

Social Equity

Economic Justice

Worker & Consumer
Protections

Harm Reduction

Parabola Center's Goal: Steer us towards the center!

It's the reason we were founded as a 501(c)(3) charitable organization free from private interests.

Drawing From the Past

Our parabola theory follows in the footsteps of previous iterations and continues their legacy of using the parabola framework to envision effective drug regulation.

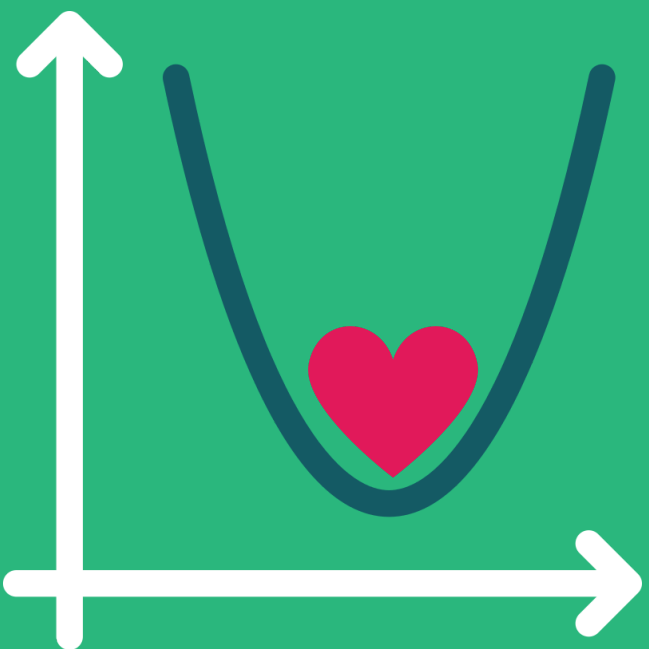

John Marks, the mind behind the original concept of the parabola in 1993
(More on him soon!)

Looking Towards the Future

**Parabola
Center**

We use the parabola graph to guide our ongoing work and invite you to consider whether it can help shape your own approach to drug policy.
